THE ROSENBERG CASE: Facts and Fiction

○

By

DR. S. ANDHIL FINEBERG

October 29, 1953

Cloth bound \$2.50

Why was Ruth Greenglass never convicted?

How reliable are the conclusions of Dr. Harold S. Urey?

What will become of the Rosenberg children?

These questions and others, equally significant, are analyzed in this book, which presents for the first time the American point of view in the Rosenberg Case. It is a factual account of what took place in the courts, meeting halls, and on the streets from the time of the Rosenbergs' arrest through the demonstrations in the capitals of Europe after their execution.

The author is an authority on racial and religious prejudice and on totalitarian propaganda. This book expands his articles on the case in the July *American Legion Magazine* and in the September *Reader's Digest*.

Forced Labor: The Communist Betrayal of Human Rights

By

ROGER N. BALDWIN, Editor

Introduction by A. A. BERLE, JR.

This book is a quiet, scholarly, completely documented report on the most ferocious mass slavery known to history. It shows specifically and in detail how Russia and her satellites and allies are basing an ever-increasing part of their production upon forced labor.

"... Roger Baldwin has been fighting for civil liberties in America for most of his life. The data used comes largely from the United Nations Ad Hoc Committee on Forced Labor and from the affidavits of men and women who have escaped from the slave camps and whose stories, now accessible by the thousands, follow a pattern too similar to be lacking in significance."—STERLING NORTH

JOHN Q. TILSON

Reviewed In The Library Journal

For many years Speaker of Connecticut House of Representatives, later majority leader in House of Representatives in Washington, now lecturer in parliamentary law at Yale, author combines practical experience and theoretical knowledge of subject. Concise and clear presentation; thorough but not too technical it ought to prove a useful and handy guide for anybody active in deliberative bodies. In a small way, a help to our democratic way of life, it will take its place beside the time-honored Robert's "Rules of Order." Recommended, H. H. Bernt, Prof., Econ. & Govt., Elmira College.

PLEASE NOTE: Professor Tilson's book is based on the *American* system of Parliamentary Procedure.

**FRENCH ADMINISTRATIVE LAW
AND THE COMMON-LAW WORLD**

By

BERNARD SCHWARTZ

Here is a sound and arresting book discussing two crucial problems confronting all modern democracies in which the executive and administrative structure is more and more exempt from judicial controls.

What is the inevitable outcome of executive and bureaucratic powers unchecked? Professor Schwartz feels it can only be that structure of horror, the Orwellian state of 1984. And what force is to challenge and check these powers that no one has delegated? The author believes that the rule of law, working through judicial review of administrative action, as in France, is the answer.

In this scholarly new book, he demonstrates that there are important lessons we can learn from the French system and apply to our own, without doing violence to our common-law tradition.

THE PRESIDENT: OFFICE AND POWERS

By

EDWARD S. CORWIN

HENRY REINING, JR., *Southern California Law Review*: "It is not for nothing that this is the only one of the several books on the Presidency which has ever gone beyond one edition. It is probably the best of the lot. The author qualifies as one of our great scholars on the Constitution, and this book is primarily a work of scholarship in public law. But he is not content with mere scholarship. He writes with verve and imagination, and his writing is easily read."

HUMAN RIGHTS IN THE MODERN WORLD

By

ARTHUR NORMAN HOLCOMBE

RALPH W. PAGE, *Philadelphia Bulletin*: "Here is a scholarly, comprehensive and fascinating account of the origin, development and present conception of human rights. It makes it perfectly clear that the definition of these rights, their acceptance and enforcement are in the beginning stages and cannot conceivably be realized except by degrees as the mass of human beings emerge from ignorance to understanding of their own relation to one another."

THE SENSE OF INJUSTICE:

AN ANTHROPOCENTRIC VIEW OF LAW

By

EDMOND N. CAHN

Legal philosophy, when it has seen fit to turn its eyes toward men, has customarily regarded them either as a row of identical pegs on which to hang rights and interests or as mere particular instances of some conceptualized being called "Man" but, when the law of a state is infringed and someone has to be punished, is it a concept or a living person that we send to jail? The abstraction performs an effectual function in the operating machinery of law, but the ultimate consumer of the product will always be some quite concrete individual.

AMERICAN AND LATIN-AMERICAN LAW**

By

PHANOR J. EDER

In view of the increasing interest in South America, this book provides vital information for lawyers with dealings south of the border. While designed primarily for the legal profession, all students will reach a better understanding of our own culture in learning how similar legal problems are dealt with in the two systems.

The comprehensive bibliographies from American, English, French, German, Italian, Portuguese, and Spanish (both Spain and South America) sources are a rich storehouse in themselves for the student and lawyer.

LESTER BERNHARDT ORFIELD

There has been no influential American textbook in the field of criminal procedure in recent years. Of course, there have been many valuable studies and a number of surveys. These Professor Orfield has carefully weighed along with the case and statutory law on the subject and compared with English and Continental experience. Through many years of sustained study, he has succeeded in distilling the wisdom of all this experience, which he has presented in this volume.
